

# Guillaume SESCOUSSE

Axe 1 - Equipe PsyR<sup>2</sup>  
PhD in neuroscience

## RESEARCH TOPICS

I'm a cognitive neuroscientist interested in reward processing and risky decision-making. I'm particularly interested in how those processes are impaired in various psychiatric disorders, in particular gambling addiction.

## METHODS

I use a combination of neuroimaging techniques (fMRI, PET), pharmacological manipulations, and behavioral approaches derived from experimental economics.

## TRAINING

- PhD in neuroscience  
(Institut des Sciences Cognitives, CNRS - Lyon) 2011
- Post-doctoral fellow in the lab at the Donders  
Institute (Nijmegen, Netherlands) 2011-2017
- Tenured researcher at Inserm  
(CRNL, Lyon, France) Since 2018
